Love of The Wild

— BY —
ARCHIB P. McKISHNIE
Printed by Special Arrangement
with The Allen,
Toronto, Ont.

(Continued.)

"And nobody can spoil his work," said Gloss gently, "dear old Bill." "Run along children," laughed Peeler. "I've got my pockets full of things that Paisley sent to town for. silk thread, silk cloth—three dollars a yard; look here." He tapped one of his large, bulging pockets. "Bill's gone into the dress-makin' business, it seems."

Gloss clasped her brown hand and her eyes danced.

"Oh," she begged, "won't you let me come too? I want to see all those things. I surely do."

"Tut-tut," scolded Peeler, screwing up his face, "that wouldn't do at all. I'm tellin' too much. 'I'm a poor hand at keepin' secrets.'"

He plunged among the trees, his face frowning and his eyes laughing, and when he had put one of the wide ridges between himself and Gloss he clasped his hands and laughed like a boy.

"She don't know that Bill is gettin' all this costly finery for her. Bless her," he murmured, wiping his eyes. "She don't suspect a thing—not a thing. God bless her dear heart. Ah, but all the silver-fox hides in all this big woods couldn't make a coat good enough for our girl, let alone six as Bill has. But it's Bill's little wish," he added; "it's just Bill's little wish. And Bill's one of God's big men."

Bill scarcely looked his part on this particular evening. Peeler found him sitting just outside his home, his sleeves rolled up to his elbows, and his sinewy arms shining with bear-oil. Across his seamed face were a number of greasy smears, left there by brushing away a troublesome mosquito. Between his teeth he gripped a short clay pipe. At his feet lay a pile of traps, tangled together and red with rust.

"Got back, eh?" he grinned, as Peeler approached. "Get them things, Jim?"

"Sure Bill," and Peeler commenced emptying his pockets.

"Jim," said Paisley, "I guess I'd best have your good wife help me out on this coat. I thought maybe she'd do the linin'. Suppose she would?"

"Do I suppose? Well, I do better?" answered Peeler, "I know she will."

"Then don't empty out 'till you get home. I'll drop over tomorrow night. I've got to get these traps in shape if I'm goin' to do any trappin' this season. Who'd you see over at Bridgtown, Jim?"

"Just a few that Declute wants over to his loggin'," answered Peeler, seating himself on a bench, "an' that man Smythe who keeps the store."

"What do you think 'o that feller?" Paisley made a dip for the pan of bear-oil and started scrubbing another trap.

"Well, I don't just think I'm takin' to him much," replied Peeler. "I don't like the way he has of shiftn' his eyes, and he always seems to be expectin' somebody. He sort of makes me nervous. He tried to find out all about every person that lives here, but I wasn't sayin' much. Somehow I wish Tom Gray hadn't sold out his store to this feller, Bill. I don't know why, but I can't take to him."

"Ishaw," grunted Paisley, "I guess we're all too quick at takin' dislikes. I'll own I feel pretty much the same as you. Did he tell you that he was hand in hand with Watson? I don't see Watson yet, but I'm anxious to meet him."

"He was askin' me about Widder Ross," said Peeler. "Wanted to know how much property she owned, and all that. Said that he liked her—what he had seen of her."

Paisley dropped his trap and stared through the twilight at his friend.

"Buy gum?" he exclaimed, "what do you think of that?"

"He told me quite a lot of things about Colonel Hallibut," said Peeler, coming over and seating himself close beside Paisley. "Bill, it looks as if Hallibut was bound to scopy us off this place. Smythe says he is a bad man to hinder, once he has made up his mind. He says as both him and Watson is in sympathy with us, and if we'll only let on we're agreeable to leave, that him and Watson'll see he don't get hold of the leas-"

Paisley took his pipe from his mouth and laid it on a nearby block.

"Jim," he said, "I don't know this man Smythe very well, but you can bet on this—the man's a liar. Him and Watson are hand in hand with old Hallibut, and it's my impression they're all a pack of rascals. Hallibut threatens to drive us into the bay if we refuse to be reasonable—as he calls it. I was talkin' to one of the fellers who runs that mill of

his this afternoon, and he says Hallibut rides over to Bridgtown most every day and lays plans with Smythe and Watson. He said as today Hallibut intended goin' over there. Didn't see him, I suppose?"

Peeler shook his head.

"No, but I met Watson tonight—him and Simpson."

"There you are," cried Paisley; "there you are. Watson intended to come here today, and you can bet that old reprobate Hallibut has a hand in anything Watson does."

"Then you think them fellers are goin' to try some funny work, do you Bill?"

"Jim," answered Paisley, "it's my opinion that there's goin' to be trouble here soon. Them people have laid plans to get our woods, and of course we'll naturally see that they don't. But what I'm afraid of is that Boy McTavish is goin' to kill somebody sure. You know what he's like. Jim, so I want to ask you to do this; no matter what you see or hear, don't tell Boy. I've just about raised him, you might say, and I know his moods. There's enough trouble over there at Big Mac's now. If we just keep cool everything'll come out right. We'll keep our eyes and ears open, and whatever we see or hear we'll try to meet without Boy knowin' anything about it. What d'ye say, Jim?"

"Sure," answered Peeler. "I think same's you, Bill. It won't do to be too hasty if things come to the worst, which I hope they won't."

"Amen to that," said Paisley fervently. "I trust there'll be no trouble, Jim. Old Injun Noah was here today, and I could see that something was worryin' him. You know he won't talk—only to Gloss; so I could not get anything out of him."

"When old Noah worries there's something in the wind alright," said Peeler. "Good old Noah!"

"He stayed here with me quite a time," said Paisley, "and he never said a word till he was leavin'." Then he said:

"Bushwhacker no shoot, no kill big man. That mean bad, bad for bushwhacker. Bushwhacker wait—wait and see. And before I could ask him anythin' he was gone."

"He comes mysterious and he goes mysterious," said Peeler slowly, "but I reckon he knows even more than we do about old Hallibut and his gang."

He arose and walked toward the path.

"Will you come over to Big Mac's?" Bill, he asked.

"Sure I will."

Paisley dived into the house, washed his hands and face, threw on a jacket, and came forth a bright and smiling six feet of manhood.

"I'm wantin' to see the little sick woman," said Peeler, "and hear Big Mac's fiddle again."

"Boy was here this mornin'," said Bill as the two struck off down the path, "and he says the ma is awful long."

A damp wind off the bay bore on its wings the scent of bog and marsh, and from high overhead came the wing-songs of inflying wild ducks. From inside came the music of the fiddle playing "Ye Banks and Braes."

(To be continued.)

Transition From Death to Life

French Surgeon Declares Beating of Heart May Be Restarted

Resurrection from the dead is no longer merely a Biblical legend, but an authenticated fact, according to the celebrated French surgeon, Tuffier, "may restore life to a heart which has stopped beating can be re-animated."

"Injections of adrenalin in the cardiac cavity," says Dr. Tuffier, "may restore life to a heart already dead. The heart may also be kept beating artificially for a certain length of time, by means of massage or certain massage or chemical excitants."

Dr. Tuffier's statements have created a great sensation in Paris, where medical circles are discussing the possibilities of saving lives by artificial heat stimulation, just as is now practised by artificial breathing.

Dr. Tuffier also claims that a man can live for years with a bullet in his heart. In fact, says the eminent surgeon, the heart is far from being the frail organ it is generally supposed to be. Delicate operations, he claims, can be performed in the heart tissues without mortal effect.

Paper Clothing

"So it's clothing made from paper dey want to bring into this country?" said Abie, the Seneca street tailor, when interviewed on the subject.

"You don't tell me? Not a nice little joke on us, eh? Baybe they think they will put us out of business, if you ask me I'll tell you that the American people will stand for no such monkey business as paper clothing. It's allright for the poor people of Kalamazoo, but no vum in America will buy \$2 paper suits ven dey can get all wool vums made out of cotton for a hundred."

Most men's tempers are fairly decent when they are sound asleep.

W. N. U. 1331.

Finest Thing Ever For Chronic Catarrh!

Gets Away From the Medicine Habit, Cures by Novel Method

With the many remedies you have tried you surely know that no liquid medicine can cure your throat or nose. Even a gargle only bathes the entrance of the throat—it can't really get inside, nor can it reach the inflamed bronchial tubes.

With Catarrhose it's so different from medicine-taking—you simply breathe its healing vapor, inhale its balsamic fumes, which carry cure and relief to the minutest air cells in the lungs, nose, throat, and bronchial tubes.

In this scientific way the soreness and inflammation is rapidly allayed, relaxed cords are toned up, the entire mucous membrane invigorated. Every trace of catarrh disappears, the throat, hawking, spitting and disagreeable drooping of mucus in the throat, all these sure signs of catarrh and bronchitis are permanently cured by Catarrhose. Large outfit lasts two months, costs \$1.00; small size 50 cents, trial size 25 cents, at dealers everywhere.

Iron Ore Deposits In Australia

Recent Discovery Will Yield 65 Per Cent Pure Metallic Iron

The recent discovery of enormous deposits of iron ore at Yampi Sound in northwestern Australia, is of great importance to the world. A lode several hundred feet thick and over 100 feet wide runs many miles through two islands. Something like 100,000,000 tons of ore, with an average of 65 percent pure metallic iron, is actually in sight; and the situation is such that the quarried material can be delivered by chutes directly into ship's holds.

The world's consumption of iron is of course, tremendous, and is steadily increasing. At present the supply is obtained from a few great deposits of rich ore, but these will not last indefinitely, and when they have been exhausted, mankind will be compelled to fall back upon lower grade ores.

This will mean higher cost of extraction and a corresponding rise in the price of iron.

Iron is in reality the most precious of the metals, inasmuch as it is the one most necessary to the human race. Our modern civilization might be said to be based upon it. It is the chief giver of color to earth and rock. Nearly all substances contain it. It circulates in the blood of animals and pervades the juices of plants. The black specks to be observed in any handful of beach sand are magnetic iron ore.

Many years ago a railroad was built for the purpose of fetching iron ore from the mines of the Vermilion Mountains, in the Lake Superior region. A cut through the Mesaba Range revealed the greatest iron deposit in existence, but the ore appeared in such unfamiliar shape that at first it was not recognized. It was soft, gravelly stuff, which now is dug out with steam-shovels. Experts say that nowhere else does the crust of the earth contain so large a mass of wealth.

Explorers have been astonished to find in the wilds of Africa savages acquainted with the art of getting iron from its ores and working it. To smelt the ore they use a primitive blast furnace of baked mud, with charcoal for fuel and bellows to engender the requisite high heat. It seems altogether likely that the knowledge of these processes was originally derived from their ancestors in pre-historic days from the Arabs and Phoenicians, who then, as in later times, overran most of Africa.

Inoculation for Influenza

Sure Preventative Says Sir Kenneth Goadby, Prominent Bacteriologist

That medical science was aware that there would be a second influenza epidemic in 1918 and that steps were taken to guard the soldiers against it, with signal success, by the means of a special method of inoculation, was the statement of Sir Kenneth Goadby, prominent London bacteriologist, on his way to Boston where he is to lecture on latent infections.

He added that the deadly nature of this epidemic is due to certain microbes which can easily be rendered comparatively harmless by simple inoculations, and that if this method were adopted at the beginning of any epidemic the mortality rate would be greatly decreased.

Record Fields of Rye

A field of rye has just been threshed in Southern Alberta which averaged 49 bushels to the acre. This yield was obtained from 60 acres. This is the largest field of rye to have been reported in that district. At the present price at which this grain is selling, namely \$.02 per bushel, the crop is worth practically \$100 an acre.

German Air Trip Round the World

A non-stop dirigible flight around the world will be attempted by the Zeppelin Dirigible Balloon builders in Germany within the next twelve months, according to a statement in New York by Major Charles J. Glidden, an official of the aero club of America.

German Cities Without Cars

Public Unable to Pay the Price Took To Walking

Owing to the enormous increase in the cost of operation, street car service in many of the smaller German cities has been discontinued. Jena, Wuersburg, Freiberg, and Heilbronn are among the towns trying now to get along without trams. Attempts were made to keep the lines going by radial increases in fares, but the public, unable to pay the price, took to walking.

Berlin and other large cities, where street car traffic has fallen off alarmingly because of the increased fares, are facing the problem of reorganizing the service, retaining only those lines which are absolutely necessary for the accommodation of persons having to travel long distances. Wagons and carts brought out to give a lift to pedestrians during recent strikes of street car employees have indicated which routes through Berlin are vital for transportation.

Good Reason

"What reason have you for saying that the defendant was intoxicated?" "Well, your honor, when his wife called me over I found him in the cellar trying to split kindling with the lawn mower."

Plan Revolution for Austria

Russian Soviets Spreading Trouble in Central Europe

Soviet Russia is preparing to foment a revolution in central Europe, scheduled to take place in October. Lincoln Steffans, chief propaganda agent of the soviet government has arrived in Vienna, accompanied by soviet commissioners.

They have been commissioned to create headquarters in the Austrian capital, from which all the propaganda of the revolutionists will be sent, and which ultimately will become the headquarters of the revolution itself.

These reports are brought back to Paris from Vienna by Americans who say that Steffans is making no secret of the fact that Austria is expected quietly to turn Communist. When this is accomplished, he is quoted as saying, the revolution will spread to Czechoslovakia, Roumania, Hungary and from the latter country into Germany and even further west.

GIRLS DRAW A MOIST CLOTH THROUGH HAIR

Let "Danderine" save your hair and double its beauty.

Oh, girls, such an abundance of thick, heavy, invigorated hair, a perfect mass of wavy, silky hair, gloriously fluffy, bright and so easy to manage.

Just moisten a cloth with a little "Danderine" and carefully draw it through your hair, taking one small strand at a time; this magically removes all dirt, excess oil and grease, but your hair is not left brittle, dry, stringy or faded, but charmingly soft, with glossy golden gleams and tender tints. The youthful glints, tints and color are again in your hair.

"Danderine" is a tonic-beautifier. Besides doubling the beauty of the hair at once, it checks dandruff and stops falling hair. Get a delightful Danderine for a few cents at any drug or toilet counter and use it as a dressing and invigorator as told on the bottle.

Aeroplane as Ambulance

The value of the aeroplane as an ambulance was demonstrated at Camp Borden, Ont., when Lieut. Townley, a member of the instructional staff and a former overseas flyer, was conveyed from the camp to a Toronto hospital in forty minutes. Lieut. Townley, while engaged in some work at the camp, started an old wound, necessitating medical attention. The camp doctor, himself an experienced flyer, had the wounded officer placed in a machine, which he then piloted to Toronto.

Canada's Fisheries

Although the total catch of sea fish in Canada in the month of June was 22,104 cwt. less than in June, 1919, its total value was \$576,518 greater. The total value of the June catch at the points of landing was \$3,586,776 as against \$3,019,250 in the same month last year.

There is always a chance that an opportunity may be connected with a galvanic battery.

Reclamation Projects

Half a Million Acres of Land Being Reclaimed

Forty reclamation projects involving 400,000 to 500,000 acres of land are planned in Alberta and Saskatchewan, and surveys are being conducted to determine the cost and means of bringing water covered areas into agriculturally useful surfaces. Several lakes will be drained as well as certain low-lying stretches in the Lesser Slave Lake district, in Northern Alberta. The scheme will also embrace inundated areas east of Prince Albert, Saskatchewan and a 1,000-mile tract between the Carrot and Saskatchewan Rivers, will be surveyed.

Strange Cradles

An infant in Guinea is usually buried in sand up to its waist whenever the mother is busy, and this is the only cradle it ever knows. The little Lapp, on the other hand, fares most luxuriously in its mother's shoe. These Lapp shoes are big affairs of skin stuffed with moss, and can be hung on a peg or tree branch safely out of the way.

Trade in Canada Not Slackening

Manufacturers Report Improved Efficiency On Part of Labor

The Canadian Bank of Commerce, in its monthly statement, says: "There are no signs of a general slackening in external or internal Canadian trade, although political developments in Europe do not presage an early resumption of normal trading between Canada and that continent. A further decline in the price of wheat, wool and a few other commodities has naturally made buying more cautious, but in the domestic situation there is no lack of confidence. Manufacturers in many centres report improved efficiency on the part of labor, indicating a trend in the direction of more normal conditions. By relinquishing its control of the wheat market, the Dominion government has shown its belief that the usual method will be found adequate for the handling of this season's crop of cereals, which promised to be above the average."

Orders by Pigeon Post

English Butcher Uses Pigeons To Carry Orders to Shop

An entirely practical use of homing pigeons is reported from England. The inventor of the system is a butcher's son, who employs his birds regularly to carry orders from outlying districts—presumably where there are no telephones—to his father's shop. The plan works excellently.

When the boy goes to collect orders he takes six of his fastest birds with him. After he has gone a mile or two and collected a dozen orders he liberates a pigeon with the slips enclosed in a little metal case attached to the bird's foot. Before five minutes have elapsed these orders are in the shop.

At the various stages of his round, which usually takes three hours, the other birds, with more orders, are set free, and by the time the shop is reached all the orders received by this pigeon post have been despatched.

Why is the average man more polite to people he never expects to see again than to those whose good opinion is worth cultivating?

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" on Aspirin is of like 14 Karat on gold. It positively identifies the only genuine Aspirin—the Aspirin prescribed by physicians for over nineteen years and now made in Canada.

Always buy an unbroken package. There is only one Aspirin—"Bayer"—You must say "Bayer."

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monocetate of Salicylic Acid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Lacombe Aberdeen Angus Calf Club To Meet Shortly

At a meeting of the Aberdeen Angus Calf Club, held in Lacombe last Tuesday night it was decided to call a general meeting to ratify the rules and to appoint two breeders to select and arrange the distribution of the calves and also to appoint two or four men to secure money necessary for prizes at this show. In the meantime the secretary is sending a letter to each director explaining the details of proceedings at the meeting and enclosing an application form for membership in the club. In this way he hopes to secure the names of the most likely boys at once so that he will have them on hand at the next meeting.

Any boy or girl between the ages of 9 and 19 years of age are eligible for membership in the calf club, which is organized for the purpose of interesting them in the breeding of pure-bred Aberdeen Angus stock. The Lacombe branch of The Merchants Bank, which will supply money on the club's note, backed by the director's Guarantee Bond, the club taking a lien note on the calf.

"Rigging" The Market?

Montreal has been sending out promises that the price of flour is due to take an early drop. That may be, but there is room to suspect that the forecasts are intended for effect on the wheat market. Montreal interests are concerned in beating down the price they have to pay the farmer for wheat rather than to reducing the price the consumer has to pay them for flour; and the season is at hand when the wheat crop must be cornered at low rates if that is to be done at all. If the farmer can be persuaded that a break in the price of flour is in prospect he is likely to rush his wheat to the elevator and take what he can get for it. That would suit the Montreal interests nicely. With the wheat in hand they could easily explain why the promised cheap flour failed to arrive on the scene. Their motto is to

get the farmer "coming" and the consumer "going".

These Farms Are Typical of Our Present Listings

1 Good grass quarter 5 miles from Lacombe—Black loam, water all year, some timber; good hay meadow; no hills. Price \$2800.00.

2 Quarter section 3 miles from elevator and 8 miles from Lacombe; high level land; fenced; 150 acres cultivated; good water; all fenced and crossed; good 2 story frame house; good barn with loft; store house and garage; including half the crop. Price \$60.00 per acre on terms.

3 Quarter section close to Lacombe; 75 acres broken; good 2 story frame house; large barn; water; well fenced; balance land arable. Price \$7140.00; third cash and balance on easy terms.

4 Quarter section 11 miles from Lacombe and 4 miles from shipping—level nice land about half open; balance brush, nice hay meadow; all arable fenced. Price \$20.00 acre on easy terms.

5 200 acres 4 miles from elevator, all fenced; good grain land; 45 acres broken; balance mostly open land; set of frame buildings. Price \$20.00 per acre on easy terms.

6 320 acres 5 1-2 miles from Blackfalds; 1 1-2 miles from school; rich black land; gently rolling land; fenced and crossed; 2 story frame house on concrete; lathed and plastered; stable; granary and smithy; 110 acres broken; 80 or 90 more open land; drilled well; Price \$40.00 per acre with all of crop—will sell as going concern.

7 410 acres 3 1-2 miles from Mirror on the shores of Buffalo Lake; gently rolling high land; rich black loam free from rock and sand; 3 miles Lake front; all fenced with 3 and 4 strands and some woven wire; 320 acres cultivated; balance all arable but 1 acre. 2 story frame house on concrete 30 x 30 and 8 x 10; furnace and fireplace; lathed and plastered and painted; large barn on stone foundation; 2 story granary with elevator; machine shed and garage. Frost here in growing season unknown; will raise corn; tomatoes; cucumbers and tobacco in the open; A REAL HOME—Price \$75.00 per acre; \$10,000.00 cash, balance to suit purchaser.

Fraser MacDonald Agency

Law Breaking Druggist

Saskatchewan druggists who are caught bootlegging suffer the loss of their license to sell liquor on prescription. The penalty is logical. At that the offenders get off cheap. They might even be deprived of the right to keep drug stores. A man who violates the law in regard to the sale of one kind of medicine is not to be trusted to keep the law in regard to the sale of other kinds. A boot-legger druggist is also likely enough, a dispenser of "dope".

For Sale

General Store and Feed Barn for sale cheap. Good opening. For further particulars apply to M. Orchard, Leslieville.

Strayed

Strayed from our yards, one black bull. Any person seeing same kindly notify A. Gilmour, Phone 20.

Bull Estray

One Red Shorthorn Bull, three years old came into my pasture 21st Aug. Owner may get same by paying expenses. H. J. Bailey, 18-39-25.

Foreign Railways and Rates

During December, 1919, and January, 1920, the Italian railways advanced their first-class passenger fares 80 per cent, their second-class fares 60 per cent, and their third-class fares 50 per cent. Both freight and passenger rates already during the war had been advanced 30 to 45 per cent.

The passenger rates of the French railways, two of which are owned by the government and all of which are being operated under government control, were advanced 40 per cent during the war and the freight rates 30 to 37 per cent. Because of the deficits which have continued to be incurred proposals for further advances have been under consideration.

The advances in rates on the Austrian railways since pre-war days have been enormous. The increase of 30 per cent made in February, 1920, made the total increases about 330 per cent.

In September, 1919, freight and passenger rates in Belgium had been increased 40 to 50 per cent since pre-war times. Further increases have been made since then.

In September, 1919, freight and passenger rates in The Netherlands were advanced 50 per cent.

Very much the largest advances reported in any country have been made in Germany, where, it is well known, practically all the railways are owned and operated by the government. Repeated advances were made during the war and still further very great advances have been made since the signing of the armistice. The passenger rates now average about 700 per cent higher than before the war, and the freight rates about 800 per cent higher.

Large advances in rates have also had to be made in many countries which were remote from the seat of hostilities. For example, in December, 1919, all freight and passenger rates on the South African Government railways were advanced 25 per cent, while in August, 1919, a raise of 20 per cent in both freight and passenger rates was made in Brazil, and in October of the same year additional increases were proposed. Even in Australia, which was about as remote from the theatre of hostilities as any part of the world, all the government railways have suffered severely from the effects of the war and have had to make advances in their rates.

The railways of Great Britain were placed under government control at the beginning of the war and are still being thus operated. During the war the passenger rates were advanced 50 per cent, while the freight rates were not advanced at all, and because the increases in expenses greatly exceeded the increases in rates the government incurred a large deficit. To reduce or wipe out this deficit advances in the freight rates of the British railways ranging from 25 to 100 per cent were made effective on January 15, 1920, and extra charges were added to rates which cover the collection and delivery of freight at stations as well as its transportation. In March, 1920, the demurrage charges imposed for holding a car one day beyond the period of free time were increased 100 per cent, and the charges for subsequent days 200 per cent.

2 lots 18, 19 in block 6. All 50 ft. fronts and 120 ft. deep. Have

5 bottom 14 inch Oliver engine gang plow, new, plowed only
14 acres; 1 hay rack; shovels, forks, log chains, doubletrees, etc.
1 loffel coal stove; 1 mattress and spring; 1 desk; 3 pump-
jacks; 1 1 3/4 h. Mogul engine; 1 twelve barrel galvanized
water tank; 1 tank heater; 1 folding bed complete; bedstead
springs and mattresses; 1 sewing machine; 1 dresser; 6 chairs
1 rooker; 1 high chair; 1 kitchen cupboard; 1 dining table;
kitchen table; dishes and cooking utensils; 1 cook stove;
heater; 1 shot gun; 1 rifle; bed clothes; 1 child's bed-
stead.

TERMS—6 months time with joint bankable lien notes with
8 p.c. interest from date; 5 p.c. discount for cash on all sums
over \$20.00

NOTE—As Mr. Bunch is leaving this country, everything is sold to be sold. This is a real closing out sale, and an opportunity of this kind only happens once in a life time. We want you to read this list over carefully and we want you to arrange to attend this sale. We believe that we have something to sell that will interest both the farmer and the Business men, alike as Mr. Bunch is selling at this sale some of the most valuable real estate in the town of Rimbeay as well as some of the best livestock and farm implements to be found anywhere. Be there. It sells.

C. F. DAMRON, AUCTIONEER.
NO RESERVE **LUNCH AT NOON**

Rev. J. T. Gordon, and family are guests at present at the Presbyterian Manse. Rev. A. T. Barr is a brother-in-law.

Phone in your orders for Bankhead hard nut coal to the Atlas Lumber Co. so you can use your base burner this winter.

Prof. Touche will resume his music teaching on Wednesday, Sept. 1st. Junior Choir practice and orchestra rehearsal at 7 p.m. and 8 p.m. respectively at the studio, on Wednesday. The gold and silver medals won by the two highest in the recent examination will be presented upon this occasion. Prof. Touche here extends a cordial invitation to parents of his pupils to attend any of the orchestral rehearsals held each week, and they may bring with them any friend who may be interested in this work.

Place your order with the Atlas for storm doors and windows. They provide comfort and save coal.

Two heating stoves for sale. Apply W. E. Tees, Lacombe.

Blackfalds W. I. Notes
A meeting will be held at the home of Mrs. Farewell on Saturday next. Mrs. Fred Miller, Mrs. Barnes and

Miss Noble, President of the Albert Women's Institute will address meeting in the Public Hall when a large attendance is desired. A hearty invitation is extended to the Lacombe and Red Deer Ladies. Note the date Tuesday Sept. 7th at 8 p.m.

In the coming referendum, those who are required by the Dominion Franchise Act to procure a Judge's Certificate, may receive same on application at the following point and time. Red Deer, week commencing Aug. 20.

School girl wants place in town where she can get board and room exchange for services out of school.

Some time ago a dark coat was lost on the Gull Lake Trail, and a person phoned this shop that they had found same. We would ask the party kindly phone us as we have found the owner of same.

Miss Freddie Halpin left on Tuesday for her school at Alix.

Waterman fountain pen lost in Lacombe. Reward at this office for return.

A warrant is out for the arrest of Harry J. Buckeye, formerly of Lecombe, on a charge of embezzlement from a Washington Bank, in which he was employed recently.

The regular members of St. Andrew's Church Choir, and any other who would like to join are requested to be on hand at the church at 8 p.m. on Thursday 2nd Sept.

Miss Winnie Winter received word this week that she had been successful in passing Grade XI examination.

Thursday Sep. 2nd, at 8 p.m. The A. Y. P. A. will hold a five hundred party in F. V. Parson's new store (Opposite the Vet Theatre). Admission 50c. Refreshments will be served.

Board and Room may be secured
phoning 17, Lacombe.

GRACE METHODIST CHURCH

The regular services will be resumed in Grace Methodist Church, Sunday next (Sept 5). Morning Worship at 11 a.m., Sunday School at 10 a.m., Evening Worship at 7.30 p.m.

Minister will preach at both services. Morning subject: "Ye shall not go in haste;" evening, "Have we lost our way?" a Labor Day message.

Warning of the danger to life a result of carelessness in leaving guns loaded is issued by Inspector Piper of the Alberta Provincial Police, com-

Why lost his life when his friend fired a gun that was not known to be charged.

"With the approach of shooting season the hunters can not take too much care," remarked Inspector Piper Monday "The magazines of all rifles should be emptied as soon as

shooting tour is over. It is a terrible thing for a person to lose his or her life as a result of the carelessness of others, and too much precaution cannot be taken. In my opinion, leave no stone unturned should be made a crime.

Engineer Wants Position

Job wanted by an experienced Engineer, on a plowing or thresh outfit for the season; with accommodation for small family. Can start once. Can furnish references. Address: [illegible]

It Is Not Enough

to have the bowels move. It is more important to persuade liver, kidneys, skin, and bowels to act in harmony and against self-poisoning. BEECHAM'S PILLS act favorably upon all organs concerned in food-digestion and waste-elimination; they remove causes as well as relieve symptoms.

BEECHAM'S PILLS

Worth a Guinea a box.

Sold everywhere in Canada. In boxes, 25c., 50c.

Passing Events

Second only to the perverted view held by a vast majority of people that the chief aim in life is the amassing of money and the enjoyment of those fleeting pleasures and luxuries which money can procure, is the gullibility of the public in snatching at get-rich-quick schemes which unscrupulous but clever promoters and swindlers dangle before the people. The idea that there is something fine and noble in work itself, in worthy ambitions realized, in service well rendered, and that a monetary reward is not the be-all and end-all of existence appears to be fast dying out, and a person's success or failure in life has come to be measured by the standard of his success in amassing money. It is a false standard and an unsatisfactory one. The truly successful men and women are those who can point with conscious pride to some real achievement benefiting themselves and their fellow men.

The desire to get money not honestly earned—which can only be gained by one individual through the loss by some other individual—and to get it quickly and without effort is the bait used on every trap set for the unwary, and for every one who does obtain wealth in this ill-gotten way there are hundreds of victims who lose. The latest example is afforded by the operations of a man named Ponzi, at Boston, who promised to pay 50 percent profit in ninety days on monies invested with him. Thousands of people entrusted him with their money to a total of many millions of dollars. Now he is bankrupt and in prison, while his victims are sadder, but it is doubtful if they are wiser. The only safe road to wealth is along the cultivation and practice of habits of industry, frugality, perseverance and care. And even this road may not lead to the desired haven. But if it does not, there need be no regrets for travelling along such a road a person will at least have the satisfaction of accomplishing something, and leaving the world better than he found it.

Indications as to the relative degree of activity prevailing in business circles in Eastern and Western Canada are shown by various statistical tables for the month of July last, and these reveal the fact that, while development in the East is only about holding its own with last year, in the West very marked strides forward are being made. Building permits issued in July in 26 Eastern cities totalled \$7,242,536 as compared with \$6,919,444 in July, 1919, an increase of only \$271,495; whereas in fourteen Western cities permits issued amounted to \$5,098,650 as compared with \$1,726,595 a year ago, or an increase of \$3,372,055.

Several large Eastern manufacturing concerns have shut down portions of their plants temporarily, or have reduced their staffs, thus throwing a considerable number of men out of employment, one firm alone, which has run three shifts of workers for the past nine years, cutting the number to two and releasing 600 men from employment.

On the other hand, the annual influx of harvest hands into the West has brought thousands of young men here, and the banks are anticipating the need of generous assistance from the federal government in the task of financing the marketing and transportation of the 1920 grain crop which promises to be the best for some years past.

In this column some weeks ago the advice was tendered to all who

could possibly do so to buy their winter's supply of coal and get it in storage during the summer months before the grain crop began pouring into the elevators for transportation to the lake ports. Those who followed this advice will unquestionably be glad of it, not only because they are assured of an adequate fuel supply in the face of a probable shortage, but because of the money they will have saved thereby as it now seems almost a certainty that there will be a decided increase in freight rates and a consequent substantial jump in the price of coal. In these modern and more commercial days the parable of the wise and foolish virgins still holds good. We call it "Preparedness" or taking time by the forelock, that is all.

Externally or Internally, it is Good.

When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue as few liniments do, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will cure affections of the bronchial tubes and respiratory organs. Try it and be convinced.

Pure Gold Not Durable

Articles Made of Rolled Gold Are Fairly Strong

Rolled gold articles are sometimes better than real gold, and electroplate better than real silver. The reason is that real gold and silver articles sometimes consist of such thin metal that they dent at a touch. Sometimes even will not bear dusting. On the other hand, articles made of rolled gold have a face of genuine metal, while they have the support of base metal, and are therefore fairly strong, and may be handled without any danger. A good deal also depends upon the grade of the genuine metal. There are two grades of silver—one of these bears the stamp of the lion, and the other bears no stamp at all. In gold, as everyone knows, there are various grades, most articles being made of metal between 9 carat, 15, or 18 carat. There is also 22 carat, and there is 7 carat; but the latter is very rarely used, though one does happen on articles made with this metal from time to time.

Minard's Liniment for Dandruff.

New Canadian Warships

Cable advices received at Ottawa by the Naval Department state that the cruiser Aurora, and the destroyers Patriot and Patrician, will be in commission October 1, and will in all probability proceed to Canada in the week following. These three vessels, together with two submarines now in Canadian waters, comprise Canada's new fleet.

Western Men Appointed

The following western men have been appointed authorized trustees under the bankruptcy act: Saskatchewan—Executors and Administrators Trust Co., Ltd., Moose Jaw; Alberta—J. G. Edgar, Calgary; British Columbia—R. M. Ellis, Vancouver.

Saves Three Lives

George Bastien is to be recommended for the Humane society medal, for having saved the life of two bathers at Nobel, Ont. It is also stated he saved another life at Sault Ste. Marie some weeks ago.

When a woman can't get a servant to do her work there is no help for it.

The Human Face

If You Would Know A Man Study His Face

A human face is a marvellous thing! Strange that of the billions of faces made since time got to going, no two were ever exactly alike. Strange, too, that no one face remains long the same.

The face is the key to character. As surely as man's hand, guided by the orders of his brain, clears wide wastes, builds great cities and cuts from huge rocks the story of his achievements in lifelike figures—just as surely a man's thoughts carve and fashion daily the secret workings of his ideals and purposes in the lines and planes of his own face.

Make something of your face! There is one thing no man can hide from—his own face. Where the man goes the face must go. How tremendous the responsibility, then, of making your face a good companion, a faithful servant, an accurate representative, an active force, an interesting study—a face worth remembering.

Make something of your face. A face never lies. It may be a comic picture, a Shakespearean tragedy, a chiseled piece of power, a comedy of errors, or a wrecked god—but it is no lie. If you would know a man, study the history that is stamped on his face.

Better start associating more with your own face. Know it, train it, mold it well. It is your largest asset for no man can take it from you. Realize now, then, that the most important job for you each day is to make something of your face!

Tower of London Burgled

The burglary record has been broken in the City of London. The Tower lost its reputation as a stronghold when a burglar succeeded in not only breaking in, but getting away with the canteen cash belonging to the soldiers of the garrison. It is probably the first time in the history of the Tower of London that a burglary has taken place there, and certainly it is the first time the police have been called in to assist the soldiers stationed in England's premier fortress. Up to date they have not captured the culprit.

KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhoea, dysentery, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours' illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevents stomach and bowel troubles, or if the trouble comes suddenly—as it generally does—the Tablets will bring baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Belgians Are Doing Well

Every Inch of Soil is Cultivated and Crops are Bountiful

The British Mission at Spa were astonished at the smiling prosperity of Belgium. Every inch of soil is cultivated, and the crops are bountiful. Indeed, one might well learn a lesson from the Belgians in the use of the land. It may safely be said that in Belgium every single field is utilized to the fullest extent.

Buildings of all sorts are in splendid order. More coal is being produced than before the war; the people are working hard; there is a great deal of enterprise, and, generally speaking, Belgian industries are thriving in a remarkable way.

The Belgians are to receive eight percent of the war indemnity. If it is fixed at £6,000,000,000, they may hope to receive £480,000,000 in addition to which they are to have first charge over the first hundred millions of their share.

In other words, every Belgian will get about £60 per head war indemnity. Today the Belgians, in proportion to their numbers, are accounted the richest people in Europe.

No surgical operation is necessary in moving coins if Holloway's Corn Cure is used.

Dollars Against Doughnuts

The laboring man who works in town, because he is able to handle a few dollars more in a month than he does on the farm, overlooks a mighty important thing, and that is the food. Restaurant "cats" as a steady diet, day in and day out, do not begin to compare with the average food on the farm, and they cost a lot of money, while the farm hand gets his good wholesome meals thrown in, with no extra charge for a second helping.

Poor Man's Advantage

The poor man has more hope than the rich. The poor man may have no dinner today, but he hopes he may have one tomorrow; but the rich man, who has all and more than he wants today, and is discontented, can hardly hope for more tomorrow.

Vanderbilt Buys an Island

Cornelius Vanderbilt, Jr., states that he has purchased for his wife an island in Sprout Lake, near Alberni, Vancouver Island. He intends to construct a hunting lodge at which he and his wife will spend vacations.

Perfects Aeroplane To Explore Africa

Easily Attains Speed of A Hundred Miles an Hour

A new type of hydro-airplane, operated by three helices, has been completed and will be marketed soon by Jean Latham, son of Hubert Latham, who two years before the war met his death while hunting in the Congo.

Scientists here prophesy that Mr. Latham's invention will greatly facilitate exploration work in the interior of France's colonies, as it combines three great factors—speed, carrying power and comparative lightness of equipment, and furthermore is able to use the smallest streams in case of accident.

The cabin contains room for four passengers, as well as compartments for reserve supplies of petrol, food, wireless apparatus and machine guns, all of which are in a birch bark canoe body. All the machinery for the operation of the craft is above the heads of the passengers.

In trial tests the hydroplane, carrying three tons, mounted half a mile in four minutes, a mile in eight minutes and three miles in thirty-four minutes. The speed test showed a maximum of a hundred miles an hour, which was easily attained.

MOTHER!

"California Syrup of Figs"
Child's Best Laxative

Accept "California Syrup of Figs" only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear. You must say "California."

Less Employment in East

Reports Indicate, However, That the Labor Market Firm on Prairies

Reports from over 5,000 employers to the Dominion headquarters of the Employment Service of Canada, department of Labor, indicates that, disregarding loss of time due to strikes, there was a decline in the volume of employment during the week ending July 3, as compared with similar reports covering the previous week. A decrease had been expected, but not on such a large scale. For the following week, however, these firms anticipated making substantial additions to their payrolls. In comparison with their returns they reported that they had enlarged their staffs very considerably.

The three Prairie provinces were the only ones to record an increase, while among the declines Ontario had the biggest. The best increases were in railway construction work, edible plant products, and building construction. Further increases were expected. Largest reductions were among the firms manufacturing rubber goods and iron, steel and lumber products.

A slight decrease in placements by the employment service is recorded by the department for the week ending July 31, as compared with the previous week.

Guilt of Assassination

A man, razor in hand, was caught by his wife assassinating not an enemy, but a corn—what he needed was Putnam's Corn Extractor; it's safe, painless and cures. Try "Putnam's"—cures so fast, 25c. at all dealers.

Movies of Hudson Bay Country

The great naval seaplane of the Canadian Aero Film Company has left on an 800 mile trip to Hudson Bay, where pictures will be taken for the provincial government and a survey made for the Dominion Government. The plane is bound for Belcher Island on the west coast of Labrador in the Bay, and stops are being made at North Bay, Cochrane and Moose Factory.

High Prices at Cattle Fair

The Brandon Cattle Fair had its usual success and bidding was keen and prices high. The highest price, Aberdeen Angus, "Blackbird of Glen-carnock," brought \$3,000, and won the Female Grand Championship. The animal was retained to Canada by a Bowden, Alta. ranger. In all 65 Aberdeen Angus and 83 Shorthorns were sold.

Buflanco, an Italian painter, drew caricatures in the fourteenth century, putting labels with sentences to the mouths of his figures.

Minard's Liniment For Sale Everywhere.

SUNDAY SCHOOL LESSON

LESSON FOR SEPTEMBER 5

BUILDING OF THE TEMPLE

I. Solomon's Preparation (5:1-18).

He secured from King Hiram: 1. Wood for beams, ceilings, sheeting, and chambers around the holy house.

2. Stones for the great foundation. These were secured from Phoenician quarries and also from the mountain upon which the temple was built. They were so shaped that when the temple was erected there was no sound of a hammer heard.

3. Skilled workmen. Among the Israelites were not to be found men skilled in this kind of work, so the king arranged with Hiram to furnish capable men.

II. Solomon Building the Temple (6:1-38).

1. The location—Mount Moriah (II. Chron. 3:1). This was a suitable location, as it was here that the Lord appeared to Solomon's father, David.

2. The dimensions and materials. The temple proper was 90 feet long, 30 feet wide and 45 feet high.

3. The contents: (1) Brazen altar (2) laver (3) golden candlestick (4) cherubim.

III. The Dedication of the Temple (8:1-66).

The dedication of the temple was arranged to take place at a very favorable time. The success of an undertaking is largely determined by the time in which it is held. This most joyous of the several representative gatherings of the Jews. The dedicatory services consisted of the following:

1. Bringing up the ark (vv. 1-11).

The Ark was God's dwelling place. The ark with the two tables of stone under the mercy seat shows God manifesting himself with his people on the ground of a law perfectly kept and sins atoned for by the shedding of blood. Following the completion of the sacrifice, the temple was filled with the glory of Jehovah.

2. Solomon's address to the people (vv. 2-21). He pointed out to the people that God had chosen David to be king, yet for certain reasons did not allow him to build the temple, but promised that his son should do the work. Now that the work was done, the temple was built, and the ark of the covenant was in its place, they could be assured that God had raised him up in the room of his father.

3. Solomon's dedicatory prayer (vv. 22-53). The ark having been placed in a most holy place, and the address to the people having been ended, the king pours out his soul to God in prayer. In this prayer Solomon gratefully acknowledges God's goodness in the past, giving glory to him, and pleads that his promise to his father be verified (vv. 22-26). He prays that God's eyes may continually be opened towards the temple which he had now taken possession of (vv. 27-33), so that (1) in case of contention between parties he would judge between them (vv. 3-32); (2) in case of being smitten by the enemy, even though they had sinned, upon confession of the sin, God would forgive and restore (vv. 33, 34); (3) in case of famine as chastisement for sin, upon confession and prayer before the temple God would forgive and send rain (vv. 35, 36); (4) in case of pestilence and sickness, if they prayed to God towards the temple, God would hear and forgive (vv. 37-40); (5) in case of the coming of the foreigner, who comes at the news of God's greatness, praying towards Jerusalem, his prayer should be heard (vv. 41-45); (6) in case of going out to battle, their cause should be maintained (vv. 44-45); (7) in case of being in captivity because of sin, God would hear their prayers and restore (vv. 46-53).

4. Solomon blesses the people (vv. 54-61). On the strength of the covenant promises, he invokes God's presence always to be with them and to keep them faithful, and exhorts the people to have their hearts perfect before God, walking in his commandments and statutes.

5. Solomon and the people offer sacrifices of thanksgiving (vv. 62-66). The joy of the people was full; they blessed God and the king.

Polish Emigrants Stopped

Polish emigrants for the United States to the number of 750 have been stopped by the Danzig authorities on the Polish frontier, on the pretension that many of them are of military age and might be used in the warfare against the Bolsheviks, according to a Berlin despatch to the London Times. Two hundred of the party are children under ten and there are many women in the group. The Berlin despatch says there is much suffering.

There are 400,000 cafes in France—one for each eighty inhabitants.

Used for 70 Years

Through its use Grandmother's youthful appearance has remained until youth has become but a memory. The soft, refined, pearly white appearance it renders leaves the joy of Beauty with you for many years.

Gouard's Oriental Cream

FERD. HOPKINS & SON, Montreal.

AVOID ALUM IN FOOD

Baking Powder is one of the most important food ingredients. Alum or other injurious acids are frequently used by some concerns to lower the cost of production.

MAGIC BAKING POWDER

Contains No Alum

It is a pure phosphate baking powder and is guaranteed to be the best, purest and most healthful baking powder possible to produce.

W. Matthew Williams, in "Chemistry of Cooking," says: "Phosphates are the bone-making material of food and have something to do with building up of brain and nervous matter."

Made in Canada

Keep Thin in Middle Age

Corpulence May be Reduced by Abstaining from Fat Meats.

Adding to the bulk of the body in middle age is risky. This does not mean that the diet should be Spartan. It must be simple and moderate. Tasty dishes tempt stout people to eat too freely. Corpulence may be reduced by abstaining from fat meats, sugar, soups and pastry. Bread and potatoes should be eaten rather sparingly. Fresh fruit and green vegetables may be taken in moderation. No sedentary middle-aged person can eat hearty meals habitually without impairing health and curtailing the span of years. The diet must be plain and digestible, and the quantity eaten limited strictly to the repair of tissue expended in work.

A Shocking Tragedy

Three Hundred Patients on Hospital Ship are Drowned

Particulars have reached Stockholm of a terrible catastrophe which occurred on the Neva recently, when a hospital ship sank with 1,200 spotted typhus patients on board. It was an old German vessel. The patients were locked up in their cabins. Before the ship sank it was plundered by the Bolsheviks, who unconcernedly left the patients to their fate. About 300 are believed to have been drowned. Nothing is mentioned of the matter in the Bolshevik papers except that 200 of the crew perished.

The Imperial canal of China has a length of more than 1,000 miles.

The Roast Beef of England

KEEN'S D. S. F. MUSTARD is largely associated with the fame of England's roast beef, having been used with it for over a century.

Keen's D. S. F. Mustard

eaten with roast beef and other meats, fish, game, poultry, cheese, etc., causes better digestion, and assures full nutrition.

It has received the highest awards at exhibitions all over the world.

Predict A Drop In the Price of Flour and Bread

Montreal.—There is a distinct possibility that within the next month or so following the big wheat crop in the west and the resumption of competitive dealing by the millers, the price of flour will decrease and be followed by a drop in the price of bread. Already, it is said by representatives of the leading milling interests, there has been a drop in the market price of No. 1 Northern, which is the standard wheat for flour purposes.

When the wheat board goes out of existence it is expected that the big millers will return to their old competitive systems of buying and selling and the expectation is that in the course of time this will result in a reduction in the cost of flour and bread to the ultimate consumers.

As to just when this will take place the millers were not inclined to predict, since they were confronted with the problem of buying wheat and selling its products, but it was intimated that within a short time there might be developments that would ease the situation for the bread winner and eater.

It was stated by a leading milling expert who had just returned from a tour of observation through the west that present costs of bread depended largely upon the stocks of flour in the hands of the mills and bakers. This flour had all been bought on the basis of \$3.15 a bushel for No. 1 Northern at Fort William, as fixed by the wheat board, which the millers said had practically controlled prices both for the buying of wheat and the selling of its products.

The wheat board, it was stated, would go out of existence on August 31, and then business will return to its normal conditions, as in pre-war days the big milling firms buying in competition and selling in the same way, with no fixed prices beyond the market quotations.

Plan Trans-Continental Flight

Expect to Make Trip From Halifax To Vancouver in Record Time

Ottawa.—A trans-Canada flight, half-way by sea-plane and halfway by airplane, is contemplated by the Canadian air board, the efforts to be next month, according to a statement just issued by Hon. Hugh Guthrie, chairman of the board. It is felt the work of the board has now advanced to such an extent that some practical demonstration should be given of the possibilities of air navigation.

It is proposed to make a start from Halifax and to reach Vancouver, B. C. with stops en route at Sault Ste. Marie, Winnipeg, Calgary and other places. Should wind and weather conditions prove favorable, this trip may be made in between 40 and 50 hours including the time of stops.

Meighen to Speak at Sherbrooke

Sherbrooke, Que.—Premier Meighen will be invited to address a meeting here some time next month, it was decided at a caucus of the executives of the eastern townships' National Liberal-Conservative association held here. Hon. C. J. Doherty, minister of justice assured the meeting that the premier would accept the invitation.

Foch Not Visiting U. S.

Strasbourg, Alsace Lorraine.—Dr. Marcel Knecht, formerly of the French high commission to the United States denied on behalf of Marshall Foch that the latter plans to visit the United States in April, as announced by some of the newspapers.

Prices Due For A Fall

Washington.—Retail prices, in the opinion of the federal reserve board, will decline slightly during the coming fall and winter months, and will slump next spring to still lower levels.

Changes in the prices of raw materials which were reported to have declined sharply during the past few weeks, will not show their effect, according to the board, in retail prices until early next spring.

Join One Big Union

Winnipeg.—The Winnipeg street railway men's union has ceased to exist as an independent organization. At two recent sessions the carmen registered a solid vote for direct affiliation with the One Big Union. The organization will be known as the Street Railwaymen's unit of the One Big Union.

Lower Prices for Flour and Bread

Montreal.—It was stated by a leading milling expert here that when the new western crop started to move, a new price list for flour and other products would likely be issued, with a probability of a downward trend in the cost of bread to the consumer.

WOULD HAVE LABOR AND FARMERS JOIN POLITICAL GROUP

Renfrew, Ont.—Two thousand citizens of Renfrew and the surrounding district gave a welcome to Hon. W. L. Mackenzie King. Many could not gain admission to the armories where he spoke.

Mr. King made a strong appeal to both labor and farmers to enter politics, but not to enter as a class, because, he said, if one class gained ground jealousy would be engendered in another class which would prove dangerous to both. He invited both parties to join forces with the liberals who, he said, were real democrats and ready to put into effect the lessons which war had taught. He advocated tariff reform and described as dishonest, people who talked free trade at this stage of Canada's history. He advocated reduction of duties on necessities of life.

"The country is honeycombed with combines at the present time," he said, "and the government instead of trying to combat them, are playing into their hands." He also strongly criticized a party which changed its name, policy and premier without reference to the people. "Surely," he stated, "no one could allege they were being governed by the people."

Hon. Mr. King said no man lived a real and full life unless he took an interest in political life. The highest form of civilization was toleration and moderation and he felt proud that the mayor of Renfrew, a Conservative, had written the address which was presented him this evening.

"We are in Canada getting down to real democratic principles," he said, "and Toryism, which is the reverse of toleration, now belongs to a past century." They owed much to the life-long service of the late Sir Wilfrid Laurier; Canadian people were now becoming one not only in national ideas, but in feeling.

Mr. King spoke at length of the essential differences between the Liberal and what he described as the autocratic or Conservative line of thought. The labor and farmer movements were but an expression of Liberalism in its true form. The work of Liberalism is to gather those who are out for a democratic government; those who are out for a better life, such as the returned soldiers. Those were things that Liberalism was trying to gather together to sweep like an ocean over the land, and give much needed improvements. The labor movement was formed to represent every branch of labor and give expression of labor all over the country. This was truly democratic. The farmer movement came into being in a similar way. They started with the people themselves. Liberalism, he said, placed its trust in the people. They talked about government by the people, but they should also add for the people, and both these parties and the Liberals were out for this class of legislation.

Was there one present who could say they had a voice on either question, and yet they called it government by the people. From one end of Canada to the other, no one had a word to say as to the naming of the party, policy or premier, except the men in power themselves.

Any group of men able to draw to their side the strong financial parties and combinations, and give and accept favors between each other was an invisible government. They represent not the will of the many, but the desires of the few. The government has felt justified to resort to any means to hold the reigns of office.

On the other hand there were the democratic forces insisting on being heard. At the present time the country had been seized by an autocratic combination holding office against the wishes of the people of the country.

Munitions are Destroyed

London.—Munitions and hydroplanes valued at nearly £2,000,000, which were recently confiscated by the entente commission in the Pinesch works on the Spruce river, were destroyed by the 3,000 employees of the plant, many of whom are communists, says a Berlin despatch to the London Times.

The reichswehr was summoned out, but proved powerless to act. The government is sending representatives to the scene.

Devonshire Coming West

Ottawa.—The Duke of Devonshire, accompanied by the duchess and other members of the vice-regal family, will leave Ottawa about September 7 for an extended trip to the west. This trip, it is understood, will be similar to the one undertaken last year.

Want Peace Terms Published

Labor's Council of Action Says Now Objectionable Clause Is Removed, Way Clear

London.—Following a meeting of the council of action of the Labor party, a telegram signed by Chairman Adamson, was sent to Lloyd George, Balfour and M. Kameneff, head of the Bolshevik delegation in London. The telegram said that the council, having urged the Russian government to withdraw its objectionable civil militia clause from its demands on Poland, noted with satisfaction the Soviet's latest decision, which removed all difficulties to peace between Russia and Poland. It added that the council of action "now urges both the British and Russian governments to publish the full terms on which they are willing to make peace."

Harvesting the Wheat Crop

Binder and Thresher Heard from One End of the West to the Other

Winnipeg.—Assisted by 30,000 harvesters from eastern Canada, the farmers of the prairie provinces are taking off their crops. The sound of the binder and the thresher is heard from one end of this western country to the other, according to a report of the Canadian National railways dealing with conditions along their lines.

Most points send favorable reports. There appears to have been little damage from hail and rust, and only one or two points report any damage from frost. Generally, speaking, the weather is favorable for harvesting, and for the ripening of late grain crops.

Points in Manitoba report that great progress has been made in cutting up to the end of last week, and threshing was general. In some districts cutting was completed, in others from 15 to 50 percent of this work was done. Erickdale reports a large acreage destroyed by fire. Reports coming in show excellent to only fair. Saskatchewan's cutting is in full swing, and threshing has commenced in many places, except in a few points where rain has delayed the harvesting.

Want Protection Against Harvesters

Protest Made to Dominion Government of Travelling Conditions of Harvesters

Cochrane, Ont.—Strong protests have been made to the Dominion government by the local board of trade regarding the conditions under which harvesters to the west travel, following the recent trouble at Kapuskasing and O'Brien. The board thinks that for "sparsely peopled districts like ours," there should be some special protection provided, and urges "immediate action to compel a complete change in the mode of travel in these harvesters and also to afford protection to the localities effected so as to obviate residents of such localities having to take the law into their own hands and protect their property and lives at the point of the gun."

Copies of the resolution have been sent to Hon. F. B. Carvell, chairman of the Dominion Railway Board, D. B. Hanna, Premier Meighen and the Hon. J. D. Reid, minister of railways.

Dates for Tariff Commission

Ottawa.—The official itinerary of the tariff enquiry commission covering the four western provinces and Ontario as far east as Windsor, provides for fourteen sittings on the other side of the Great Lakes. The itinerary as announced is as follows: Winnipeg, Sept. 14; Medicine Hat, 17th; Vancouver, 20th; Victoria, 22nd; Vancouver, 24th; Vernon, 27th; Nelson, 30th; Calgary, Oct. 4; Edmonton, 6th; Saskatoon 8th; Regina, 11th; Brandon, 13th; Winnipeg, 14th; Fort William and Port Arthur, 15th; Sault Ste. Marie, 18th; Windsor, 21st.

Attempt To Swim Channel

Dover, Eng.—Another attempt by Henry Sullivan, of Lowell, Mass., to swim the English channel from Dover to Calais has ended in failure. Sullivan was in the water for eighteen hours. Owing to the rough sea he was forced to abandon his attempt when only three miles off the French coast. In 1913, Sullivan swam to within six miles of France, starting from Dover.

Yukon Placer Gold Yield

Dawson, Y. T.—The gold yield of the placer camps in the Yukon Valley for 1920 is estimated at \$4,485,000. Six weeks more will wind up the season, as the weather will begin to get cold then. There has been considerable shrinkage in the output owing to a dry season and the decrease in the purchasing power of gold.

Openings For Canadian Cadets

St. John, N. B.—Military headquarters here reports that a limited number of vacancies at the Royal Military academy, Woolwich, and the Royal Military College, Sandhurst, England, have been allotted to the Canadian government for nominations. Ages are between 17 and 18.

Cox Makes Charges

Accuses Republicans with Conspiracy To Buy Presidency

Pittsburgh.—Information to support his charges that a Republican campaign fund of \$15,000,000 was being raised "in a conspiracy to buy the presidency," was presented by Governor Cox, of Ohio, Democratic presidential candidate, in addressing a public meeting here.

Governor Cox's data consisted almost entirely of matter taken from the official bulletins of Fred W. Upham, Chicago, treasurer of the Republican national committee, but his chief exhibit was a typewritten list purporting to show Republican campaign supporters' contributions from 27 states and aggregating \$8,145,000. Names of local subscribers Governor Cox said, were ordered kept quiet. These quotas, given as \$2,000,000 for New York city, \$500,000 for Philadelphia, and ranging down to \$25,000 for smaller cities like Albany, N.Y., were said by the governor to have been announced about the middle of July.

Sheets bearing the 51 cities' quotas were "distributed" to those assembled and he produced one of the alleged quota lists, but did not state how or where it was acquired. The quota plan, he said, was carried out like that of the Liberty loan campaigns.

Increase in Joint Rates

Canadian Railway Commission's Order Goes Into Effect

Ottawa.—The order of the Railway commission, authorizing increases in the joint rates on traffic passing across the international boundary went into effect August 26. This order was made on the application of the American railway association, which represented to the railway commission that increases had been authorized by the Interstate Commerce commission of the United States, and that the rates authorized by that body should be made applicable to international joint rates. The order applies to all rates and changes which were increased under the order of the Interstate Commission.

Rate Decision Expected

Ottawa.—The decision of the board of railway commissioners in the application of Canadian railways for increased rates will probably be forthcoming within a week, Chief Commissioner Carvell has stated.

NEWS OF THE PROVINCES

MANITOBA

Winnipeg.—During the first six months of this year 12,869 immigrants from Europe and the United States passed through Winnipeg on their way west, carrying with them more than \$6,000,000 in cash and goods worth about \$2,000,000.

Plum Coulee, Man.—Burglars who moved a small safe half a mile at Horndean, near here, secured only \$20 for their trouble. The safe was taken from the office of the Winkler Lumber Company, and was blown up half a mile away.

SASKATCHEWAN

Regina.—With the exception of a few districts, there is little shortage of harvest labor in the province, according to the provincial bureau of labor. In the Regina district all the vacancies have been filled and there is no shortage or congestion.

Saskatoon.—Bishop Franz Harder, of the Mennonite church, was sentenced to serve thirty days in jail for refusing to obey the Saskatchewan school laws. He would not pay a fine of \$20, so the court ordered imprisonment.

ALBERTA

Calgary.—The South Alberta oil company, which has a 4,141-acre oil well 45 miles southwest of Calgary, has declared a dividend of 15 percent. This is the third successive year that the dividend has exceeded ten percent. Its product is used almost exclusively for tractors.

Edmonton.—Harvest leave to all municipal employees, permanent or temporary, in all departments, time off to be without pay, was granted by His Worship Mayor Clarke on his return to Edmonton after an absence of five weeks.

Edmonton.—Postal workers in conference here have decided on strict adherence to the 44 hour week.

BRITISH COLUMBIA

Victoria.—Names placed on the provincial voters' lists as a result of the recent registration number 202, 017, or 45,000 more than the total of 1919.

Victoria, B. C.—So far this season there have been 754 forest fires in British Columbia costing the government more than \$71,458, according to the latest fire report issued by the government. "Conditions are somewhat improved, but are still dangerous," the report says.

Turgeon Speaks at Regina

Criticizes Present Government And Premier's Speech At Stirling

Regina.—Hon. W. F. A. Turgeon addressed a large gathering here on the question of the tariff, dealing particularly with Premier Meighen's recent speech at Stirling, Ont. Mr. Turgeon spoke for two hours and was accorded a good hearing. He took the stand that the Premier's speech was a direct challenge to the west on the tariff issue, and strongly criticized the new government's position. "Mr. Meighen says he sees among his followers those who stand by British institutions and things of that sort," said Mr. Turgeon, "and on the other hand he sees those who would destroy them, 'wreckers,' as he calls them. I do not agree with Mr. Meighen at all. On the important thing, which is the meat of his discourse, on the question to which all these things lead—that is to say the tariff policy of Canada—I do not agree with him at all. I feel I am just as much attached and just as loyal, and so are those around me, to British institutions and methods and forms of government as Mr. Meighen; just as much and greatly more attached to that most fundamental of all British government—representative government and faith in the people. That, perhaps, is the outstanding characteristic of the government of the day. Why does it not consult the people? We all know the members of that government came into being in 1917 for a specific purpose. There was a full understanding that that purpose being accomplished, that government would come to an end. Has it? The mandate has long gone by. On what authority is the present government carrying on? Mr. Meighen admits they are carrying on. He says we are not a new government; we are born and bred from the old government; a continuation of the same regime; we are carrying on. Under what mandate? Mr. Meighen talks of British institutions and methods. Does he imagine for one moment such a state of affairs could obtain in England? The government there goes to the people when they know their mandates have expired."

Great Britain Faced With a Serious Crisis

Situation in England is Clouded With Political and Social Dangers

Montreal.—In an interview here, Lord Beaverbrook, proprietor of the London Daily Express, who has just arrived here from New York, stated that the threatened coal strike was incomparably the most important question in England today. "Here we are faced with the most serious crisis in the world's history," he added that no one seriously doubted, but that the strike would take place, and that the situation in England was big with political and social dangers. He stated that Premier Millerand's prestige had been increased immensely by the Polish victories and that he now dictates the policy of the Allies.

The Polish Victory

Eighty Thousand Reds Captured and Forty Thousand Killed

Paris.—The foreign minister has announced that France has counselled Poland to attain the best strategic military position possible until peace is signed regardless of her ethnographical frontier, because the military situation will influence the peace terms. France has advised Poland, however, to withdraw her armies within the Polish frontier upon the signing of peace, the foreign office added.

Necessity of Conserving Fish

Vancouver, B. C.—That he fully appreciated the necessity of conserving the fish of the Pacific Coast by all means possible, though he did not favor handing the administration of the British Columbia fisheries over to the provincial government there, was the assurance which Hon. C. C. Balfantyne, federal minister of marine and fisheries, gave Hon. William Sloan, minister of mines and commerce for British Columbia, during a conference with the fisheries minister.

Intoxicated Driver's Severe Sentence

Hamilton.—Wilfred Perry, of Toronto, arrested on a charge of being drunk while in charge of an automobile, was severely punished by Magistrate Juffs.

He was fined \$20, and sentenced to 30 days on the first count, and for having a bottle of liquor in his possession he was sent down for three months without the option of a fine.

Unemployment in East

Hamilton, Ont.—There is more unemployment in this city now than for many months. Many men are coming here from outside points seeking for work, but without success. It is said that there is even more female help available than there is employment for in offices and factories, but the supply of domestics is below the demand.

Successfully Plug Gas Well

Calgary, Alta.—The gas well of the Canadian Cement company, which has been blowing wild for five or six years, has been finally plugged by officials of the mining lands, and Yukon branch of the Dominion government, after efforts of noted engineers from all over the continent had failed. Over 5,000 cubic feet of mud was pumped into the well.

Successfully Plug Gas Well

Calgary, Alta.—The gas well of the Canadian Cement company, which has been blowing wild for five or six years, has been finally plugged by officials of the mining lands, and Yukon branch of the Dominion government, after efforts of noted engineers from all over the continent had failed. Over 5,000 cubic feet of mud was pumped into the well.

Irish Problems Beyond the Help Of Any Party

SERIOUS RIOTING AND DISTURBANCES STAGED AT BELFAST

Belfast.—Serious rioting broke out in Belfast during which there was considerable shooting and some incendiaryism. A number of wounded persons were taken to the hospitals.

The rioting began in the Falls district of West Belfast, the scene of the deadliest fighting in the July disturbances. It started with revolver firing near the Kashmir-road, of Evelmorris, Albert street, in the Falls area, situated in the populous mill locality and mainly inhabited by nationalists, became the new storm centre.

During the trouble an armored car appeared and fired on the rioters, a number of whom were taken into hospitals suffering from machine-gun wounds.

Crowds of shipyard workers appeared from the side streets waving Union Jacks. The military was hastily cheered, as a section of the first brigade, which was summoned for an incendiary fire. A few minutes after the fire started the whole block of buildings was a seething mass of flames. Early today Sinn Feiners in Ballymacarratt fired on the military, who returned the fire. Frank McCann was shot dead and another man was wounded.

Omagh, Ireland.—While a fair was in progress at Drumnaghy, about seven miles north-west of Omagh, a party of armed Sinn Feiners dashed through the village in motor cars and opened fire on a small force of police controlling traffic, wounding two of the men.

A sergeant in command was badly wounded and a constable received critical injuries, from which he died later. After the opening dash, the raiding party turned its attention to the barracks, which the remainder of the police were striving to defend. After a long and futile siege the Sinn Fein departed.

A large military force was dispatched to the scene from Omagh, but arrived too late to be of any assistance.

Dealing With Soldiers' Problems

Well Over A Million, Cases Dealt With by S. C. R.

Ottawa.—Some interesting details of the work of the soldiers' civil re-establishment department are furnished in a statement just issued. The total number of enquiries and problems dealt with and directly affecting men under the scheme, is 1,218,472, and this, up to the present time.

It is expected that before the bulk of the work is completed, which will be about the end of the present year, this total will run to one million and a half.

It is expected that before the bulk of the work is completed, which will be about the end of the present year, this total will run to one million and a half.

The statistics show that the total number of men who have received medical treatment with pay and allowances is 49,369, the total number of clinical treatments is 422,235 and the total of dental operations is 84,576.

Necessity of Conserving Fish

Vancouver, B. C.—That he fully appreciated the necessity of conserving the fish of the Pacific Coast by all means possible, though he did not favor handing the administration of the British Columbia fisheries over to the provincial government there, was the assurance which Hon. C. C. Balfantyne, federal minister of marine and fisheries, gave Hon. William Sloan, minister of mines and commerce for British Columbia, during a conference with the fisheries minister.

Intoxicated Driver's Severe Sentence

Hamilton.—Wilfred Perry, of Toronto, arrested on a charge of being drunk while in charge of an automobile, was severely punished by Magistrate Juffs.

He was fined \$20, and sentenced to 30 days on the first count, and for having a bottle of liquor in his possession he was sent down for three months without the option of a fine.

Successfully Plug Gas Well

Calgary, Alta.—The gas well of the Canadian Cement company, which has been blowing wild for five or six years, has been finally plugged by officials of the mining lands, and Yukon branch of the Dominion government, after efforts of noted engineers from all over the continent had failed. Over 5,000 cubic feet of mud was pumped into the well.

Ottawa.—That no individual, institution or party in Ireland now can ride the whirlwind which has been stirred up there and bring order and settled government to that unhappy country, is the opinion of the Rt. Hon. Sir Charles Hobhouse, postmaster-general in the Asquith government from 1914 to 1915, and member of parliament for Bristol from 1900 until the Liberal debacle in 1918.

Sir Charles is staying for a few days on his way back to England. He has been making an exhaustive examination of the immense tract of land in Southern Alberta which is being developed by the Canada Land and Irrigation company, of which he is the president.

The Irish people were so completely out of hand now that it would be a very wise man who could predict what the end would bring forth, so chaotic were conditions there, Sir Charles said. He did not hold out much hope for the conference of moderators which is being held now in Dublin, so long as the extremists remained outside. The problem was too deep-rooted to be settled in this way.

Sir Charles showed that he was keenly interested in the statement of policy recently enunciated by Premier Meighen, but he thought that in supporting such principles, the government was riding for a fall in the next election. He showed his firm belief in free trade in England when he stated with emphasis: "The war has taught the English people that high prices are the result of restricted importation. A tariff means restricted imports. They want no tariff."

End of the C.E.F.

Will Carefully Preserve All Documents Relating to Ex-Members Of the Army

Ottawa.—The Canadian expeditionary force is no more.

The fourteen N.C.O.'s who were employed to conclude the statistical work of the army have written "30" on the concluding page of a mass of records covering every unit and every man who ever donned a Canadian uniform. Just the number of records kept of every individual man would come as a surprise to even the soldier whose records they are. The militia department has original and duplicates of about twenty-one army forms relating to every one who served. Asked what was going to be done with the thousands of apparently useless books and army forms, a militia department official stated that they would be carefully preserved and locked away.

Prices Reach the Limit

Toronto.—In addition to about 250 wholesale grocers from various points in the Dominion at the opening of the annual meeting of the Canadian Wholesale Grocers' association here, there were also present twenty representatives of manufacturers' firms that are closely allied to the grocery jobbing trade.

Hugh Blain, of this city, president of the association, stated that he believed the prices of necessities had reached the peak, unless further demands from workmen for increased wages were made. He denied that the association was a combine, as had been alleged before the board of commerce.

Peace Delegates Want Food

Warsaw.—The Polish peace delegates at Minsk are hungry. An urgent appeal has been received by the ministry of foreign affairs asking that food be sent immediately to the delegates.

As an indication that the Minsk conference may continue indefinitely, preparations are being made to send there five young women stenographers, who have been asked for by the delegates.

Purchase by Manitoba Farmers

Winnipeg.—One of the most important farm land deals negotiated for some time in Manitoba has been concluded. Senator Aime Benard and F. Lafchee acquired the Strathcona farm for \$150,000.

The farm, which consists of 2,500 acres all in crop, is situated at Carleton Place, 15 miles west of Winnipeg.

500 on Strike Over \$5 Dispute

Sydney, N. S.—Because of a dispute over an employees time-sheet, involving a sum of about five dollars, 500 miners are on strike at Glace Bay, and No. 9 colliery, one of the most important producers of the district, is idle.

Horse Artillery Brigade

Vancouver.—The military authorities have taken possession of the horse show building on lease, in order to provide a permanent home for the 15th brigade of field artillery.

Value of Advertising Live Stock

To the well known, established, breeders of Live Stock any advice on the value of advertising is superfluous for in the large majority of cases it has been by proper advertising of high class goods that they have built up their business. The purpose of this article is to call the attention of the smaller breeders, the beginners, in the business, to the possibilities in advertising any live stock which they may have for sale. For example, every year at the Central Experimental Farm, Ottawa, there is a deluge of enquiries as to the possibility of purchasing young animals of the various classes of livestock. Needless to say the Farm is unable to fill all wants for obvious reasons such as being sold out of the particular class of stock wanted; not having animals of the age or sex wanted; and not keeping representatives of the breed wanted. In an endeavor to assist our correspondents to locate the animals they wished to purchase it has been found and sometimes too late that breeders right in their own vicinity had animals of the class of stock wanted, for sale, but as they had not been advertised for sale, nor had the intending purchaser advertised his wants, both parties missed a chance to do business which would have benefited both.

From the above it would seem that a more extended scheme of advertising on the part of the breeders who are either in need of or wish to dispose of stock would be profitable for all parties concerned. This advertising need not be very expensive. A small notice in the proper part of the local paper or in one of the farm papers which is popular in the district would serve the desired purpose quite adequately. If the number and quality of the animals warrant it, a larger advertising with an illustration would be in order.

Advertising is of course of particular value in disposing of breeding stock or animals not in condition for sale on the regular market. The writer has in mind one particular class of stock namely, aged pure bred dairy bulls of good quality and known to be breeding good stock. Many of these find their way to the butchers every year when it would be much to the advantage of the breed as well as to farmers disposing of them and lucky enough to get them, if they were kept for further years service. A little timely advertising would in many cases accomplish this end.

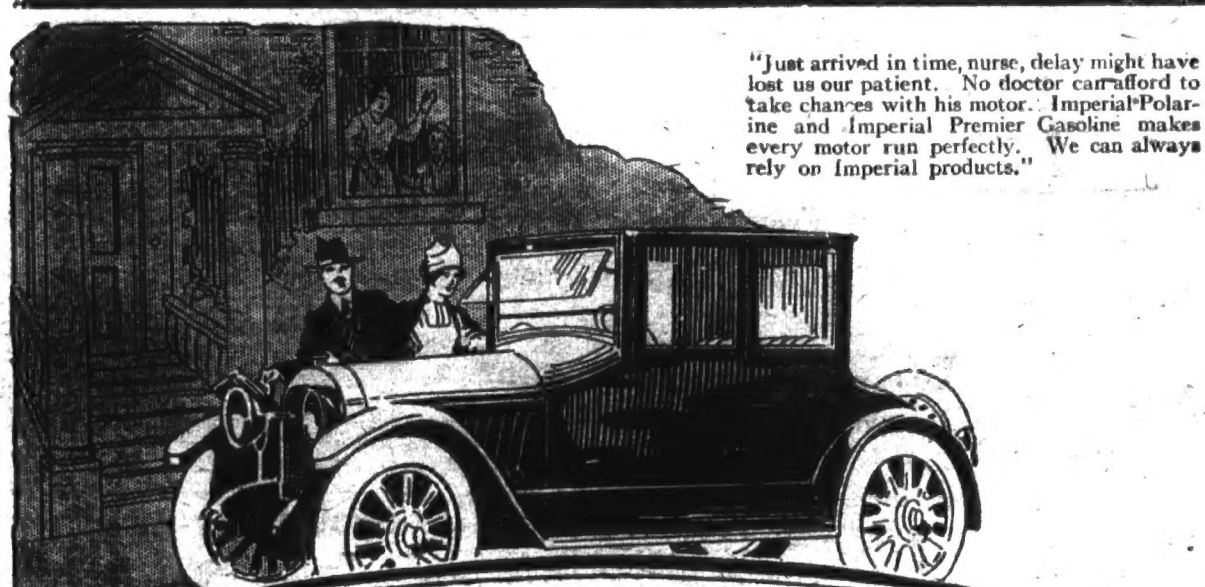

Lastly, advertising must be more or less reasonable. The greatest demand for dairy cattle and swine breeding stock is usually late winter and early spring, while sheep are more in demand in late summer and fall. Plan the advertising to meet the seasonal requirements and it can then be done most economically.

Farm For Rent

Quarter section, 6 miles west and 2 miles north of Blackfalds; 40 acres new breaking, all fenced and barn for 12 horses and other buildings. Will rent on shares. Also 8 horses and machinery for sale. For particulars apply to L. M. Baynes, Blackfalds, P. O.

"Just arrived in time, nurse, delay might have lost our patient. No doctor could afford to take chances with his motor. Imperial Polarine and Imperial Premier Gasoline makes every motor run perfectly. We can always rely on Imperial products."

You Can Depend On It

EVERY drop of Imperial Polarine is 100% lubrication. It spreads a protecting cushion of oil between all wearing parts, making each part function smoothly and reducing wear to a minimum.

It has exactly the right body—forms a perfect piston-to-cylinder seal, maintains compression, conserves power and saves fuel. It does not break down or run thin under extreme heat.

Imperial Polarine burns clean, reduces carbon deposits to a minimum and assures long life, smooth running and reliability to your motor at all times, under all conditions.

There is an Imperial Polarine grade for every motor need, from crank shaft to differential. Consult the Imperial Polarine Chart of Recommendations for the correct grade to use in your car—it is on display wherever Imperial Polarine is sold.

Sold in one and four gallon sealed cans, steel kegs, half-barrels and barrels, by dealers everywhere in Canada. Buy in large containers and save money.

Won't Pay The \$12,000

The council of the village of Gull Lake had solicitor A. M. MacDonald make a search of the records of the Land Titles Office at Edmonton this week, in an endeavor to find where Mrs. Mobley got that stuff about \$12,000 for her interest in the front age on the lake. Mr. MacDonald discovered that Mrs. Mobley had absolutely no rights on the sub-division, and it has also been discovered that many of the property owners on this sub-division cannot get the amount of land purchased without going out on the beach, which belongs to the government. It would now be in order for owners of property to take action against Mrs. Mobley and have her give them the amount of land purchased and which is called for in the plan.

Thanks are due Mrs. Mobley, however, for giving us something to talk about for a week or two when business was dull.

At The Rex Friday and Saturday Irene Castle—Star

Whether single, married or divorced, every one of your patrons is interested in married life, life and its problems. Marriage is the fabric of our existence, and pictures which deal with its dramatic phases in an entertaining manner are assured of large audiences. "The Invisible Bonds" is a stirring motion picture about real people, real facts of everyday life, and a punch climax that will bring them up standing. It is based upon a skillfully written novel, "The See Saw," which most of your people have already read and liked. Behind it there is a burning problem of today that will make them think—the question of "personal liberty," whether a man or a woman after marriage can continue their relations with other admirers and expect to be happy. But the problem is not preached or pushed at the spectator; it is woven into the absorbing story so

that you will hear them saying after the show: "There's something to that picture. It's the worth while kind I like to see."

Don't miss this great picture at the Rex on Friday and Saturday next.

Randall Lockery

At the home of the bride's parents a quiet wedding was solemnized on Saturday at high noon, when Violet Ruth Montgomery, daughter of Mr. John Lockery, became the bride of Harold Moulton Randall of Detroit, Michigan. The young couple will reside in Detroit after spending their honeymoon in Winnipeg and Eastern Points.
